- Granular user access and security controls
- Revised file backup
- Managed file sharing for internal and external parties
- Multiple folder backup (Documents, Desktop, Pictures, etc.)
- Continuous, real-time backup
- Bandwidth throttling

Access files from anywhere

Keep all of your files with you wherever you go. File Sync updates and protects your work. Users can access their files from their laptops, tablets, and phones.

Collaborate with ease

File Sync empowers users to collaborate on files using Team Shares. Anytime a file changes on a Team Share, everyone will have access to the most up-to-date version.

Share files securely

With one click of the mouse users can share files, set expiration dates, track downloads, receive notifications, and send messages.

Control your data

File Sync tracks all user activity, including adds, deletes, and changes, making it easy to download and restore any deleted files and previous versions.

Eliminate FTP and VPN

File Sync allows business to cloud-enable their file server, minimizing dependence on FTP and VPN. No more cumbersome technologies.

Our promise

If employees are using consumer-grade sync services, such as Dropbox, Google Drive, or Microsoft OneDrive, your business is at risk of data theft, data loss, corrupted data, lawsuits, compliance violations, loss of accountability, and loss of file access.

As your trusted IT service provider, we promise to work with you to minimize these risks and support your file access needs: File Sync is the only cloud file sync service that we stand behind and guarantee. Discover how file access can be easy, safe, and secure.
